

ABOUT THE COMPANY

Grinding Solutions is an innovative and consultative company specialising in mineral liberation and separation. We approach client problems without preconceptions to help maximise their value and opportunities. Our offices and laboratory are based at Tresillian Business Park, Truro, Cornwall, UK.

Our services range from metallurgical and mineral processing testing to onsite support and troubleshooting to product development and market evaluations. We aim to increase mineral recoveries and reduce overall process costs through targeting the optimal process design and operation. We work with clients across the world covering metalliferous, coal and industrial mineral industries.

Our future growth plans will provide opportunities for those of our team who are ambitious and hard working with a passion for the business and providing technical excellence.

THE ROLE

We are looking for a Laboratory Technician to join our team.

Further details on the specific role can be found on the following page.

If your application is selected to go forward to interview you will be notified by 16th November 2018.

If your application is not selected to go forward to interview, we would like to thank you for applying for this position and are sorry your application has not been successful on this occasion.

LABORATORY TECHNICIAN

The Laboratory Technician will support a variety of routine testing on mining materials through sample preparation and other laboratory testing as required.

You will be expected to be adaptable/flexible to changing work assignments and manage time effectively and efficiently. You will be required to maintain safe working practices, ensure quality work and adhere to environmental procedures.

This position will report to the Lab Manager.

The Role

- Support wider technical team to deliver projects to a high standard
- Participate in daily mineral processing lab operations including sample preparation and testing
- Lab logistics and organisation, including forklift operation
- Work safely and maintain a clean work area in accordance with standard lab practice and procedures
- Other job duties as assigned by the lab manager

Key Criteria

- Basic math and proficiency with MS Office products
- Good record keeping with attention to detail and accuracy are critical
- Good verbal and written communication skills
- Ability to work effectively in a team-based environment
- Strong interest in training and learning new methods
- Must be self-motivated with a can-do attitude

Advantageous

- Laboratory environment experience preferred but not required
- Experience with mineral processing or heavy laboratory equipment
- Knowledge of safety procedures including personal protection equipment (PPE)
- Previous forklift experience and/or licence
